Let's say the party is starting to fizzle and you just want some peace and quiet. Step aboard and be amazed at how quiet the ride is – not a peep from the engine. That's because this brand new outboard engine was designed to be exceptionally quiet and smooth. Instead, hear the wind going through your hair and your crew having normal, conversation. Pretty nice, huh? And it wouldn't be a party until the Captain does a little showing off at the end of the day. The impeccable handling of the 25SC makes tight turns at high speeds look like a piece of cake. Ending the day's activities on a high note, to say the least.
