Manufacturer Provided Description

The 210 may be the smallest Cobalt, but it brings along all the nuances of design resulting from the thought and planning lavished on our biggest performance cruisers. The 210 invites its owners toward meaningful decision-making, as every square inch of its 8'6" beam, its 22'5" length, bow scuff plate to extended swim platform, has been applied to flat-out boating fun, to ease and function and convenience at every turn.In the matter of sweet, sweet looks, 210 owners have no options whatsoever. Here are long, smooth, graceful lines, with such attention to surface detail, to the sweep and flow of subtlety as might catch a perfect light. The 210 looks good, looks big, is big. In the bow, for example, where the design showcases room, massive seating room that is every bit as real as the flared lines would have one believe.

Optional WSS Package

- Water Sports Tower w/Sunshade - From it's heavy gauge anodized polished aluminum stock to precision machined billet fittings and joints this tower is pro-athlete strong with lifelong good looks. And not a single unsightly weld in site. The perfectly integrated racks to port and starboard carry your four favorite boards in complete security. Solid. Rattle free. Then with a quick release of a swivel lock the racks swing 180 degrees inboard for safe access. Above, the accessory crossbar with LED cockpit lighting is pre-wired for optional tower spot lights and speakers, while the rigid mount sunshade has cockpit comfort covered. Canvas is color matched, of course.
- Exterior Graphics - The look begins with a split gelcoat hull design available in any combination of standard Cobalt gelcoat colors. Then comes the chrome silver WSS hull crystal cap emblems and transom Water Sports Series badge. And for the finishing touch there are three inch black chrome COBALT insignias in an edgy chiseled style.
- Interior Styling - WSS styling continues on the interior with a black powder coat to instrument and glove box panels. The glove box proudly displays the Water Sports Series badge, while the helm is dressed with extended brushed aluminum gauge bezels, and an upgraded black leather and polished stainless steering wheel. Elsewhere, the upholstery offers new owners a choice of color matched piping.
